

# Powershell - Set System Date

## Cmdlet

**Set-Date** cmdlet is used to set System Date.

In this example, we're using Get-Date to get current date

Type the following command in PowerShell ISE Console

```
Get-Date
```

## Output

You can see following output in PowerShell console.

```
Get-Date  
Saturday, May 05, 2018 9:58:06 AM
```

In this example, we're using Set-Date to add one more day to current date.

Type the following command in PowerShell ISE Console

```
set-date -Date (Get-Date).AddDays(1)
```

## Output

You can see following output in PowerShell console.

Sunday, May 06, 2018 9:59:16 AM

Now revert back to subtract added day to current date.

Type the following command in PowerShell ISE Console

```
set-date -Date (Get-Date).AddDays(-1)
```

## Output

You can see following output in PowerShell console.

```
Saturday, May 05, 2018 10:00:37 AM
```
