Powershell - Set System Time

Cmdlet

Set-Date cmdlet is used to set System Time.

In this example, we're using Get-Date to get current date

Type the following command in PowerShell ISE Console

```
get-date -displayHint time
```

Output

You can see following output in PowerShell console.

```
10:04:18 AM
```

In this example, we're using Set-Date to adjust to 60 minutes.

Type the following commands in PowerShell ISE Console

```
> $timeToAdd = New-TimeSpan -Minutes -60
> set-date -adjust $timeToAdd
```

Explore our **latest online courses** and learn new skills at your own pace. Enroll and become a certified expert to boost your career.

Output

You can see following output in PowerShell console.

```
Saturday, May 05, 2018 11:05:16 AM
```

Now revert back to substract added time to current date.

Type the following command in PowerShell ISE Console

```
> $timeToAdd = New-TimeSpan -Minutes -60
> set-date -adjust $timeToAdd
```

Output

You can see following output in PowerShell console.

Saturday, May 05, 2018 10:08:54 AM
